

HYPE PLASTIC TUBES

Light weight packaging

Why use more material and resources than necessary? Our "Hype" tubes are based on a patented production method, which allows us to connect the tube sleeve directly to the cap and saves the material for the tube shoulder. This will benefit to a lower environmental impact as well as a more cost efficient packaging solution.

Protecting Your Products – Enhancing Their Image

Maximum flexibility and minimum environmental impact

The Hype tubes are made from different polyethylene qualities, soft or hard depending on what feeling you are looking for in your tube. We can also add an extra layer of EVOH if you need enhanced barrier capacity.

Further advantages:

- Non collapsible and insensitive for outer force. Original shape is always restored which makes the brand and messages on the tube look the same throughout the life-cycle of the package.

- The tube can be transparent or completely opaque.
- Additional processing can increase possibilities in decoration using screen printing and/of foil blocking..
- With an oval or square shaped tube the display area towards the customer will increase.
- Good evacuation of content and easy to dose.
- Excellent precision with a one hand operation. Might be further enhanced by our Handsfree

Tube Packaging Excellence

Tectubes is the largest supplier of tubes in northern Europe, with experience since 1917. We are a leading partner in aluminium as well as special plastic tube packaging to the food, body-care, pharmaceutical, and household chemicals industries. We offer an extensive range of standard products, combined with the necessary skills and experience to develop customised solutions.

Sizes

- Diameter 40 and 50 mm
- Length 90 – 200 mm
- Volume 75 – 300 ml

Material

- PE, Co-ex

Decoration

- 6 colour offset
- 4 colour screen
- Foil blocking

Shape

- Oval or square
