

IN MOULD LABELLING TUBE

High quality at low cost

Tectubes is the World's largest producer of In Mould Labelling (IML) tubes. The In Mould Labelling technique provides excellent quality printing on full body length. Very fast changeovers give short lead time and low cost for the tubes.

Protecting Your Products – Enhancing Their Image

Excellent printing quality with short lead time

Tectubes is the first manufacturer to produce tubes using the IML technique. By using In Mould Labelling we increase both printing quality and printing area, while reducing both cost and lead time.

With a high level of automation and our expertise we have developed

a technology which allows label changing within the cycle – without interruption in flow of finished tubes.

Further advantages:

- Photographic print quality.
- Energy and resource efficient production method.
- Wide variety of sizes
- Standard products with quick changeovers decrease the environmental impact.

Tube Packaging Excellence

Tectubes is the largest supplier of tubes in northern Europe, with experience since 1917. We are a leading partner in aluminium as well as special plastic tube packaging to the food, body-care, pharmaceutical, and household chemicals industries. We offer an extensive range of standard products, combined with the necessary skills and experience to develop customised solutions.
