

## INJECTION MOULDED TUBES

---

### Convenient and safe

Tectubes is the World's largest producer of injection moulded tubes. Highly automated production lines together with the injection moulding technology provides large scale economy. The manufacturing process is designed for series up to many millions. These packaging solutions are primarily used by the pharmaceutical and cosmetics industries.

# Protecting Your Products – Enhancing Their Image

### Insured quality

When products require a high level of safety and traceability, it also demands a lot from the packaging. At Tectubes we are devoted to quality. We work according to GMP and are ISO 9000 certified. We design our own tools and machinery, and monitor the entire production closely. You should expect zero-faults deliveries from Tectubes.

The manufacturing process in combination with Tectubes experience makes it possible for the customer to develop unique designs with

exclusivity in dimensions and shape – sometimes not being tubes but something completely unique.

The ultimate choice for sampling tubes in large series. Size and easy filling provide good logistic and economical benefits in the supply chain globally.

Our long neck design creates proven functionality for rectal and vaginal application of content, without irritation of sensitive areas of the anatomy.

### Tube Packaging Excellence

Tectubes is the largest supplier of tubes in northern Europe, with experience since 1917. We are a leading partner in aluminium as well as special plastic tube packaging to the food, body-care, pharmaceutical, and household chemicals industries. We offer an extensive range of standard products, combined with the necessary skills and experience to develop customised solutions.

#### Sizes

- Diameter 13,5 – 22 mm
- Volume 2 – 22,5 ml

#### Material

- LLDPE

#### Decoration

- 4 colour offset

#### Nozzles

- Short neck
- Long neck

#### Closures

- Twist off
- Caps
