

EXTRUDED PLASTIC TUBES

Functionality and appearance

Our plastic tubes are used for most applications in the food and bodycare industries. Easy filling provides good logistic and economical benefits in the supply chain. Good barrier properties and a large display area with high quality decoration, and easy to use for the consumer make it an excellent choice!

- Wide range of dimensions
- Different caps and closures
- Choice of softness
- Great decoration possibilities

Protecting Your Products – Enhancing Their Image

Maximum flexibility

The plastic tubes are made from different polyethylene qualities, soft or hard depending on what feeling you are looking for in your tube. We can also add an extra layer of EVOH if you need enhanced barrier capacity.

The wide range of dimensions, caps and closures, orifice sizes and decoration methods guarantee a good solution for all your needs.

Further advantages:

- Non collapsible and insensitive for outer force. Original shape is always restored which makes the brand and messages on the tube look the same throughout the lifecycle of the package.

- The tube can be transparent or completely opaque.

- Additional processing can increase possibilities in decoration using screen printing and/or foil blocking.

- Top seal provides tamper evidence and increased transport safety against potential leaking.

- Good evacuation of content and easy to dose.

Sizes

- Diameter 16, 19, 25, 30, 35, 40 and 50 mm
- Length 50 – 200 mm
- Volume 5 – 275 ml
